

A factory finish with UV oil or UV lacquer will give your floor a natural appearance. The natural characteristics and grain structure of the wood will be preserved.

H&W finishing

In our finishing factory (H&W Finishing) we can offer you the following options:

- Sanding
- Brushing
- Scarving
- Smoking
- Oiling (UV and oxidative)
- Lacquering (UV)
- Colouring (in all the popular colours)

And of course any combination of the above mentioned options are available to you. Each finished product will be shrink-wrapped and labelled. The floor is ready to be accessed and used normally once you have installed it, saving you plenty of time on the job due to the lack of drying times. A factory finish means an equal amount of oil or lacquer is applied to each board and the floor is easier to maintain. Plus a better protection against moist and dirt.

SCARVING XPERIENCE

Scarving Xperience

Scarving Xperience is a brand new technology to give unfinished boards an unique character (aged or hand scraped in a controlled process).

- A range of different Scarving Xperience is available.
- Each with its own unique appearance.
- Can of course be combined with various colours and effects.
- It is also possible to create your very own unique Xperience by combining different types of the Scarving. The combinations are multiple.
